### BFCET, BATHINDA

Bachelor of Technology in  
Computer Science  
(2016-2020)

## LANGUAGES

Hindi - Native

Punjabi - Native

English - Professional

## ACHIEVEMENTS

- **Outstanding Individual Award of NJDP**  
Huawei, Bangalore
- **Star Bean Award**  
Huawei, Bangalore

## WORK EXPERIENCE

### Frontend Developer - WISEAPP

November 2022 - PRESENT

- Designed and developed core product features in Vue.js including **Polls/Quizzes, Live Q&A, Chat, Recorded Courses, Registration Forms, and Book Session** workflows, boosting learner engagement and streamlining instructor workflows.
- **Built real-time collaboration features** (polls, Q&A, chat, engagement tracking) using WebSockets, enabling interactive sessions and improving live participation.
- **Engineered a reusable Trends analytics component** to visualize learner/session data in WebApp and track real-time engagement in **GetLens (tab switches, drop-offs, attention peaks)**, helping instructors adapt lectures dynamically.
- **Developed a comprehensive scheduling system** (no external libraries) including a teacher availability calendar, timezone support, conflict-free slot booking, Google Calendar-style overlap handling, and multi-slot student booking with confirmation workflow.
- **Created a scalable Recorded Courses module** with drag-and-drop content organization, multi-currency payments, analytics dashboards, certificates, and diverse content types (videos, assessments, Polls, Tests, YouTube embeds).
- **Implemented platform-wide utilities** including multi-language support (Spanish, Lithuanian), terminology customization, reusable Image Cropper, drag-and-drop content organization and holiday management, enhancing flexibility, branding, and user experience.
- **Developed reusable Course Management UIs** with modern, table-based interfaces and hover actions (add tags, copy links, assign instructors/learners, edit fees), significantly improving usability and reducing admin effort.
- **Rebuilt the Wise marketing site from Webflow to React in just 8-10 days**, implementing SEO best practices (meta tags, structured data, optimized assets), and launching a dynamic pricing calculator for cost estimation.
- **Transformed the WebApp into a fully mobile-responsive platform**, deploying it as WebView-based iOS/Android apps, eliminating release delays and ensuring instant feature parity across devices.

### Graduate Engineer Trainee - HUAWEI

March 2021 - October 2022

- Developed a **customizable dashboard in Vue.js with drag-and-drop UI**, enabling users to personalize their view by arranging data cards such as tickets created, tasks completed, and productivity metrics.
- Executed a complex **migration of MySQL databases to PostgreSQL**, including comprehensive updates to Java and MVC codebases to ensure full compatibility and optimized performance.
- Collaborated with diverse business units from different countries to design, deploy, and **optimize automation pipelines using Python Selenium**, tailored to their local operational needs.

### Web developer - Intern - iBytes Academy

November 2019 - November 2020

- Assessed client needs and business requirements to design and implement customized digital solutions aligned with their specific goals.
- Leveraged expertise in WordPress, HTML/CSS, and JavaScript to deliver high-quality, responsive websites and web applications that boosted client engagement and sales.
- Enhanced user engagement and strengthened marketing initiatives by designing impactful graphics, social media creatives, and digital assets.
